## **Electrical Safety Colouring Book**

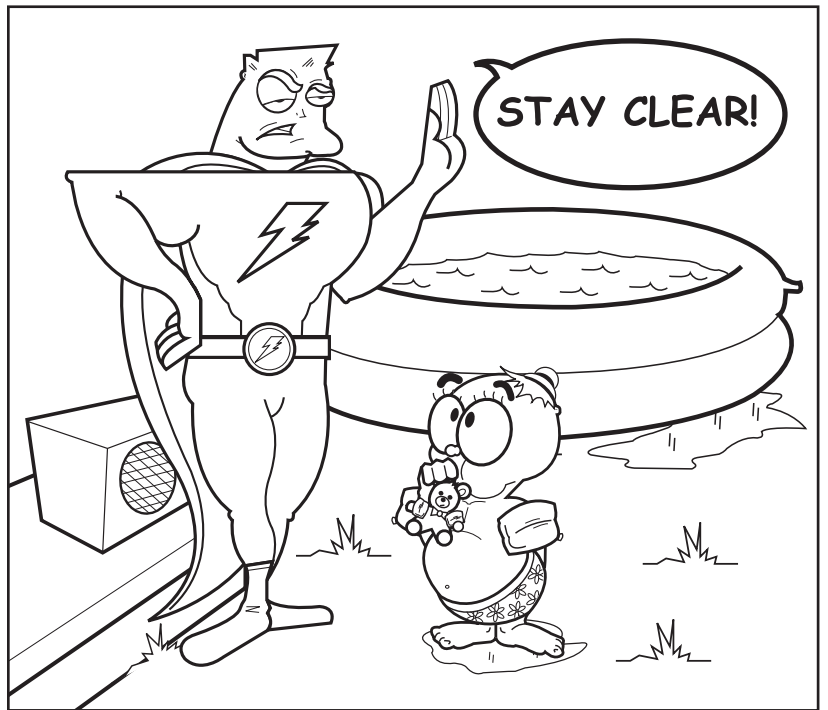

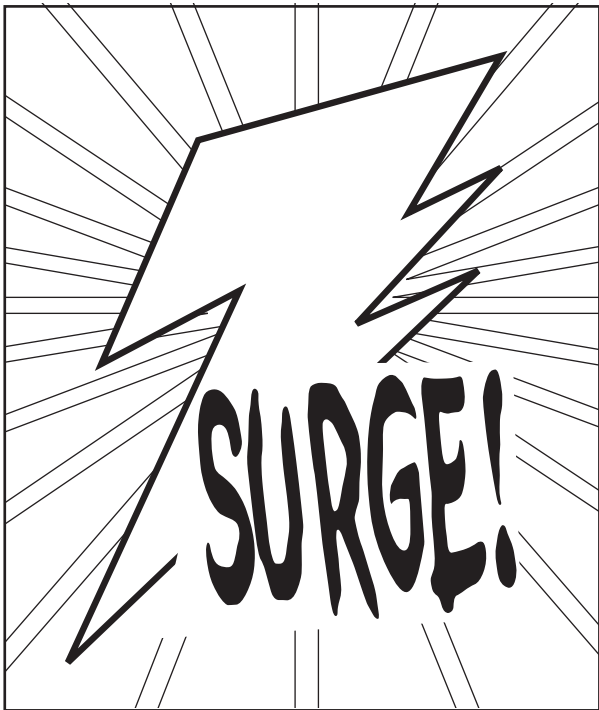

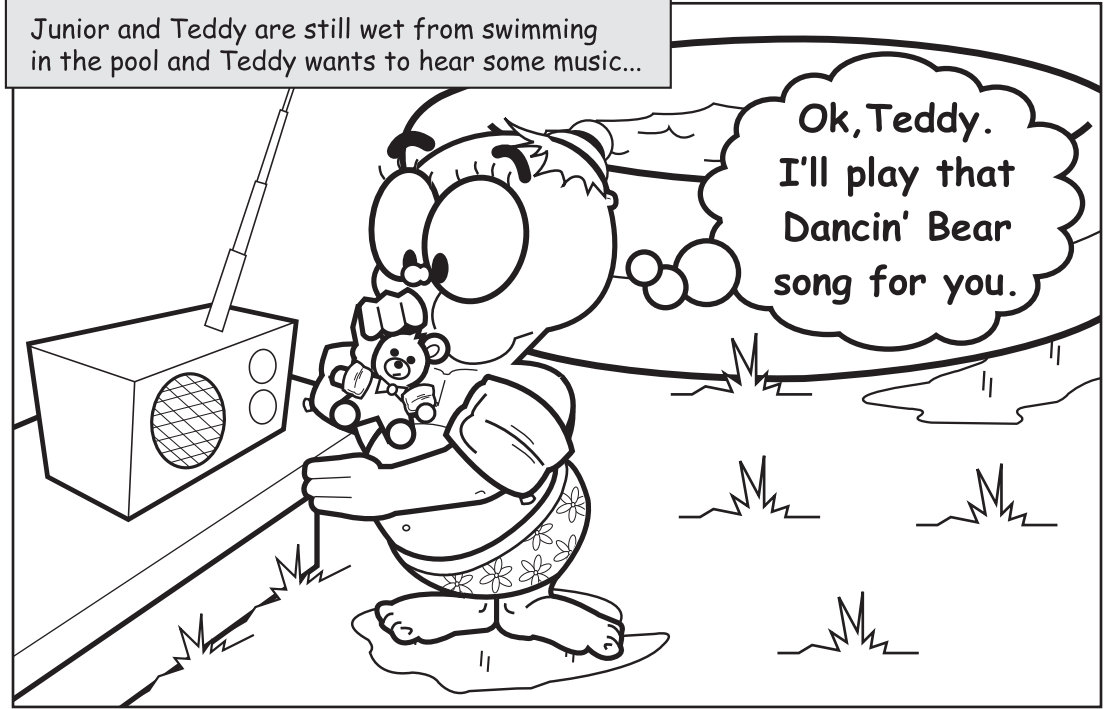

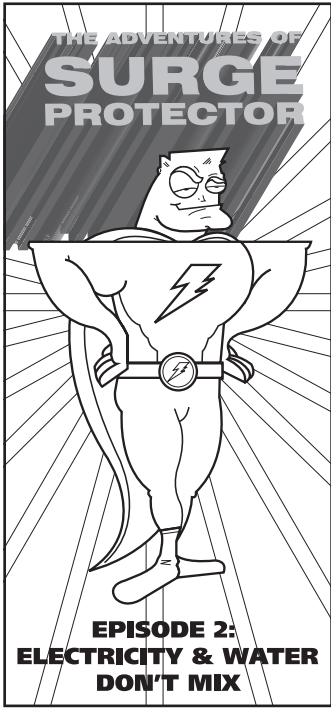

Junior and Teddy are curious...

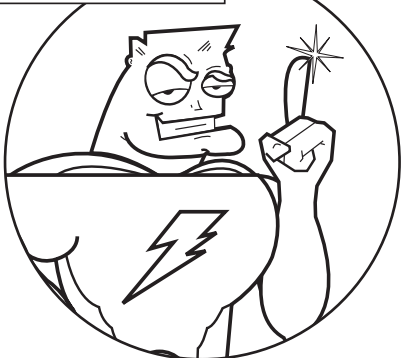

Remember...

Electrical outlets are very dangerous. You should **NEVER** put anything into an electrical outlet other than the appropriate plug and that should be done by an adult. Luckily, **SURGE PROTECTOR** was here!

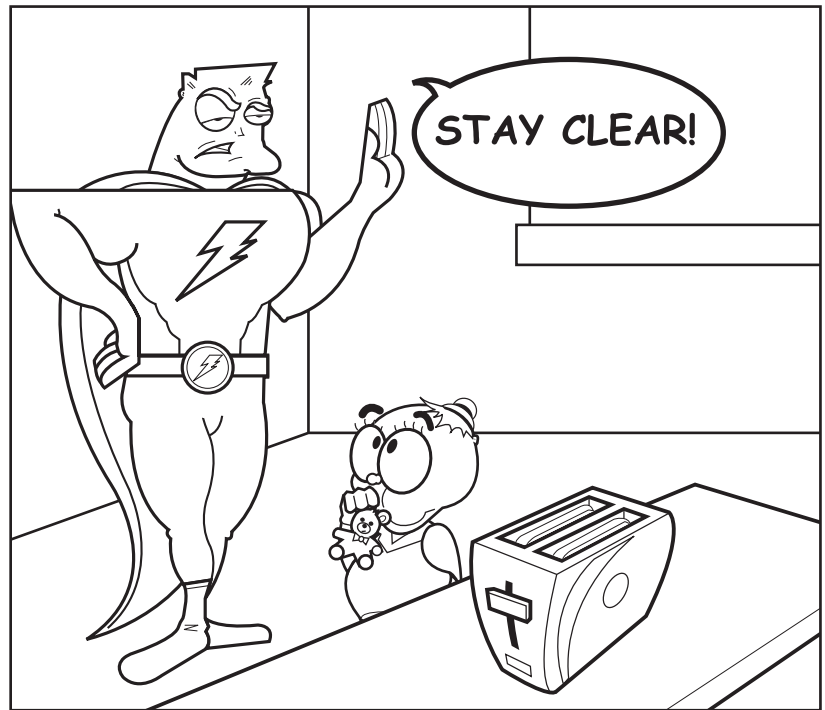

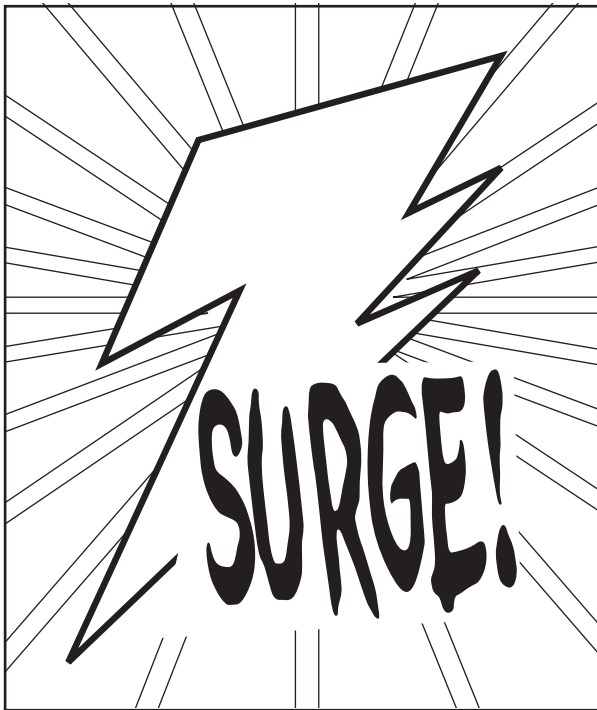

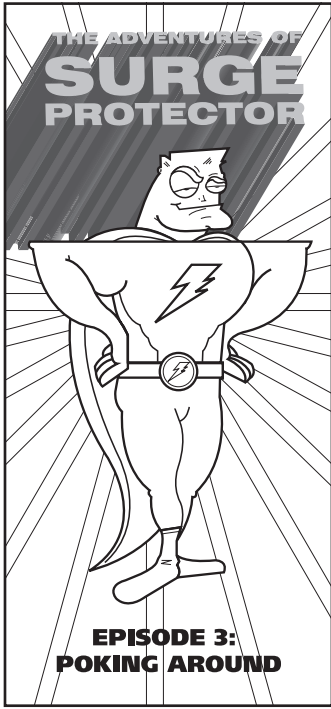

Remember...

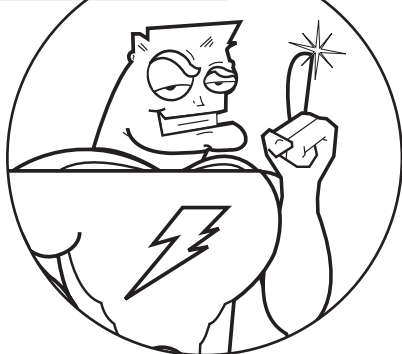

**NEVER** touch anything that uses electricity while you're wet. Most electrical mishaps occur near the swimming pool or in the bathroom.

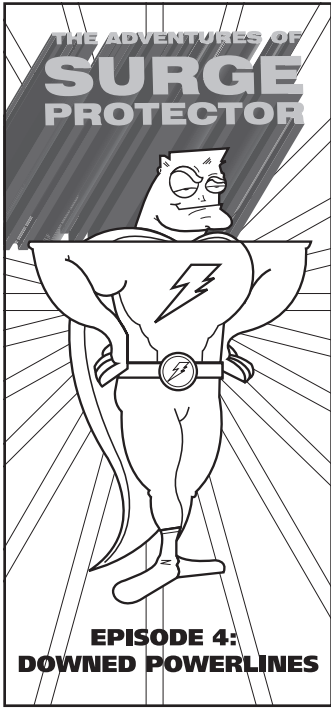

Luckily, **SURGE PROTECTOR** was here!

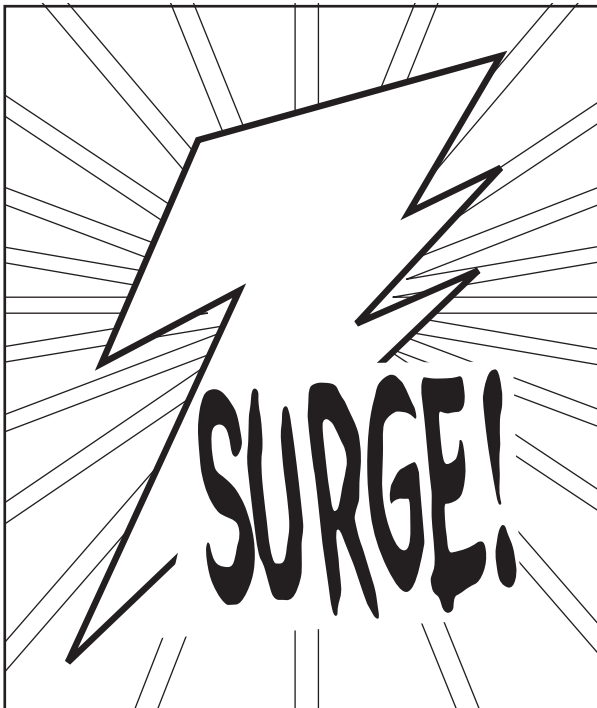

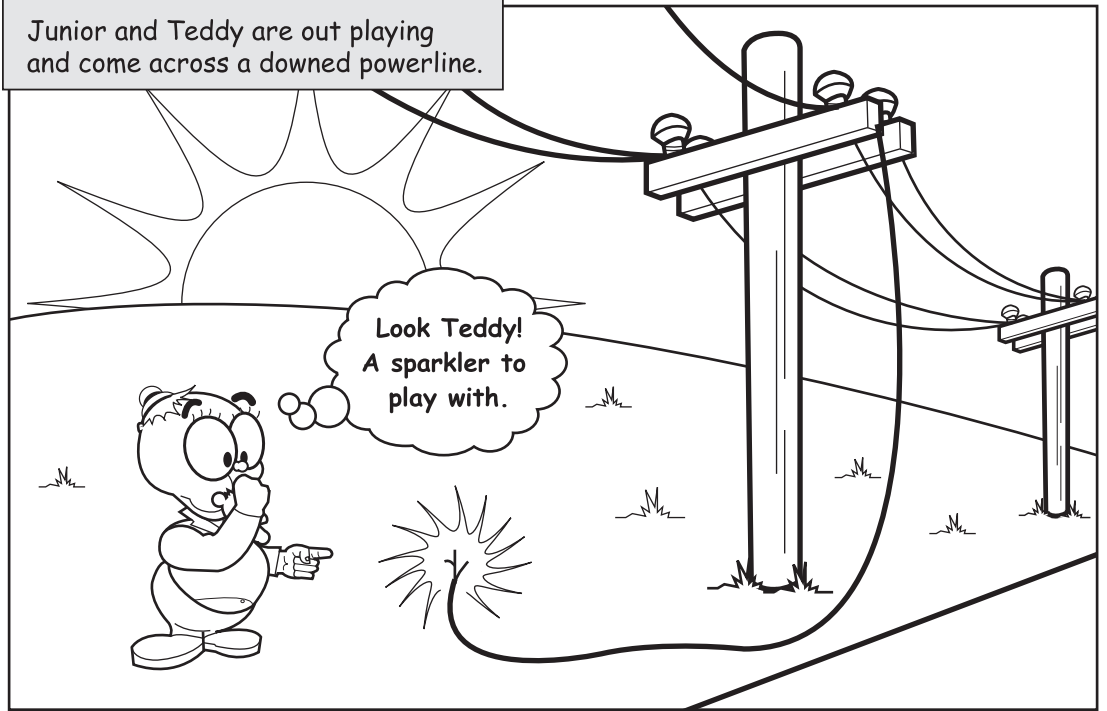

Remember...

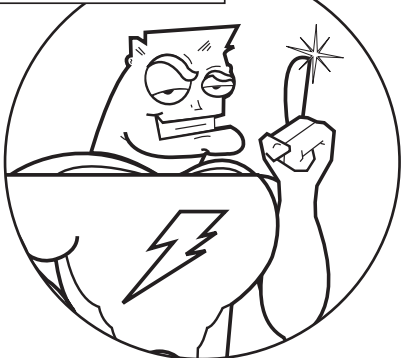

**NEVER** stick anything into an electrical appliance or electrical outlet. If something is stuck make sure the **POWER IS OFF** and ask an adult for help. Luckily, **SURGE PROTECTOR** was here!

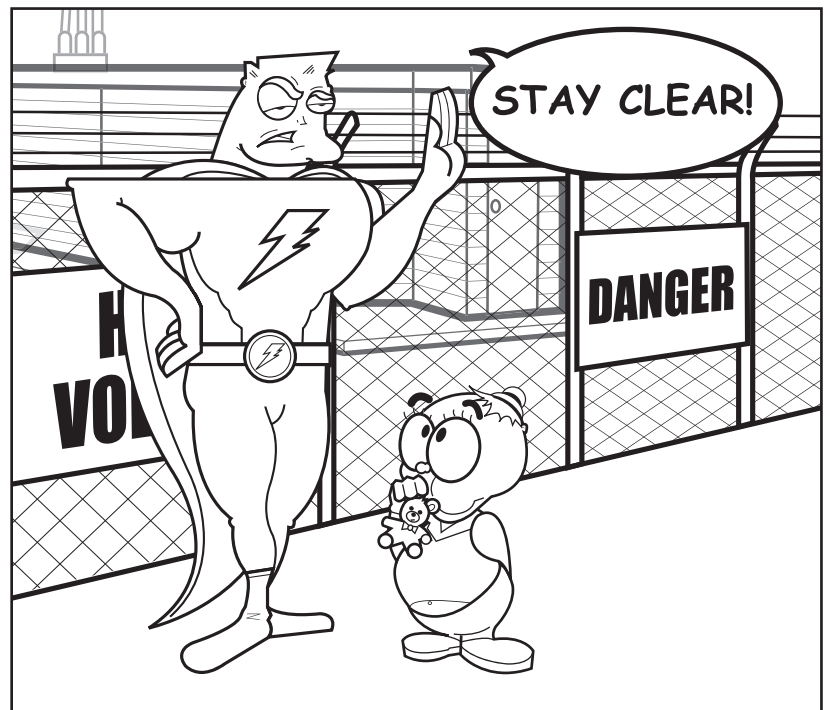

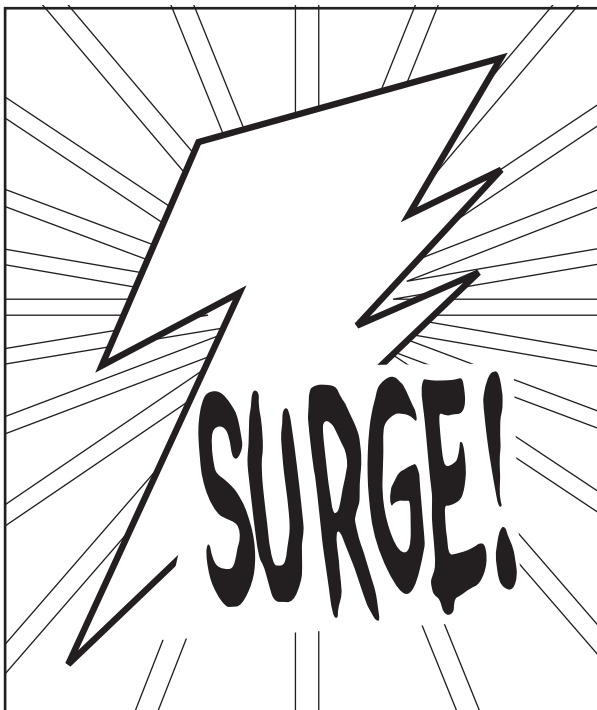

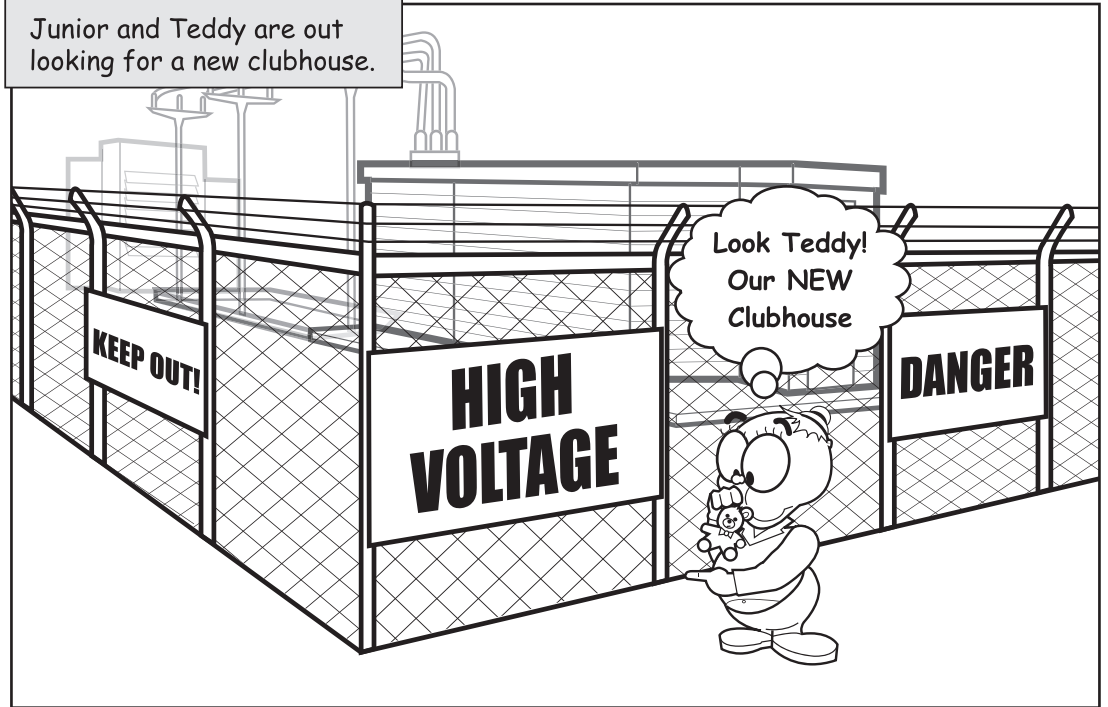

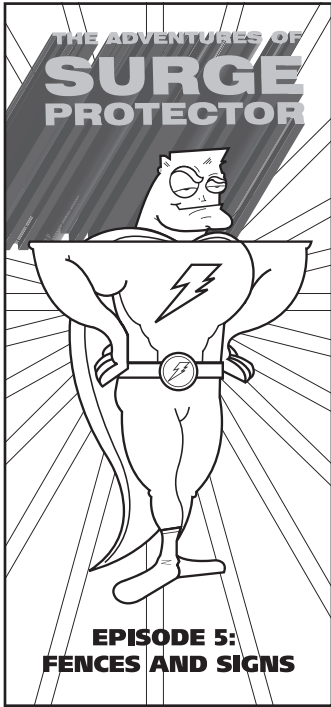

Junior and Teddy are out playing and come across a downed powerline.

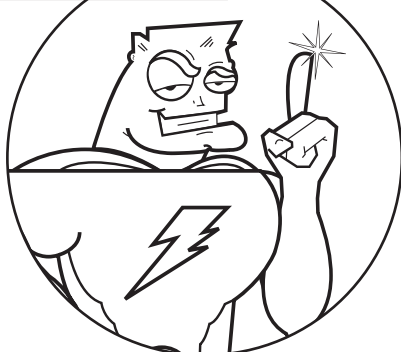

Remember...

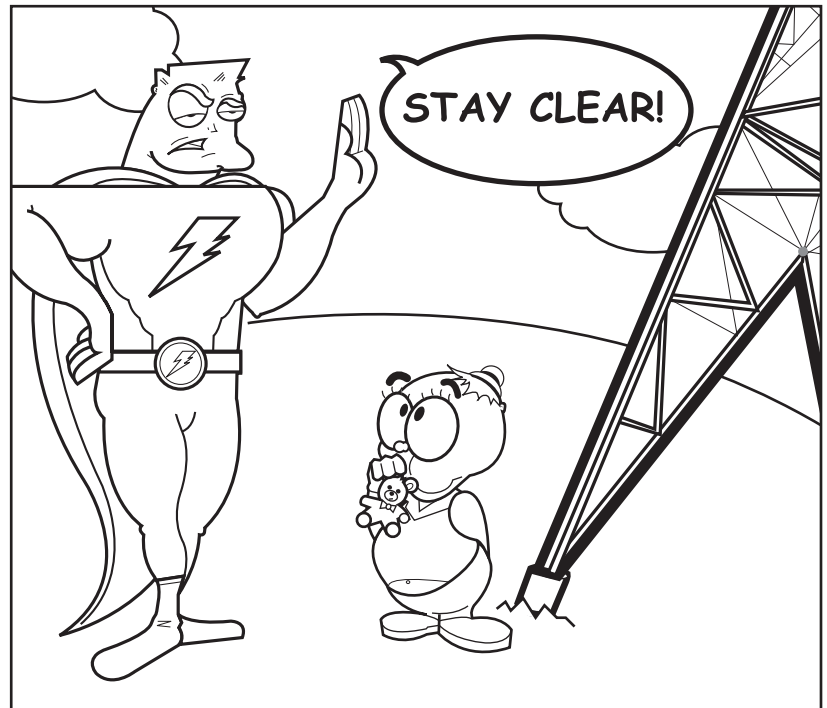

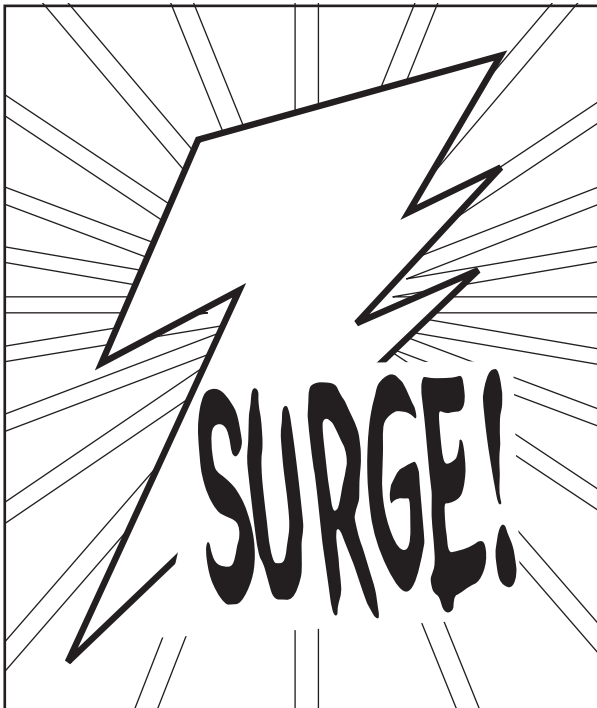

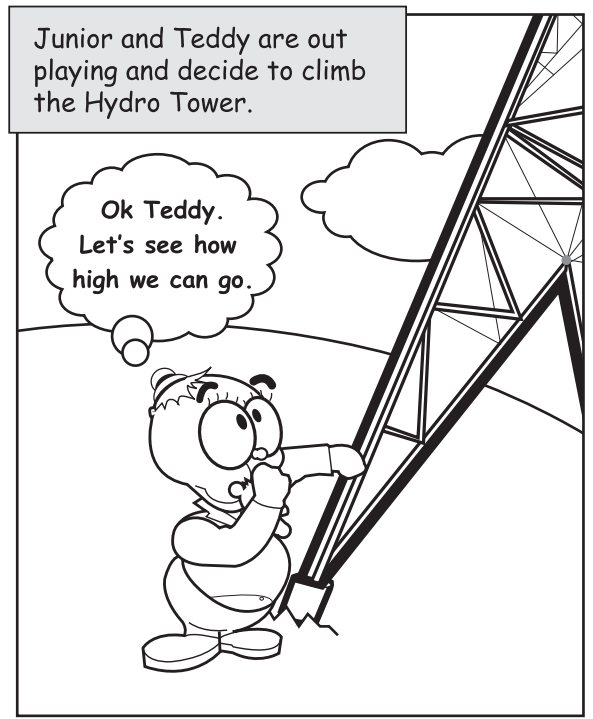

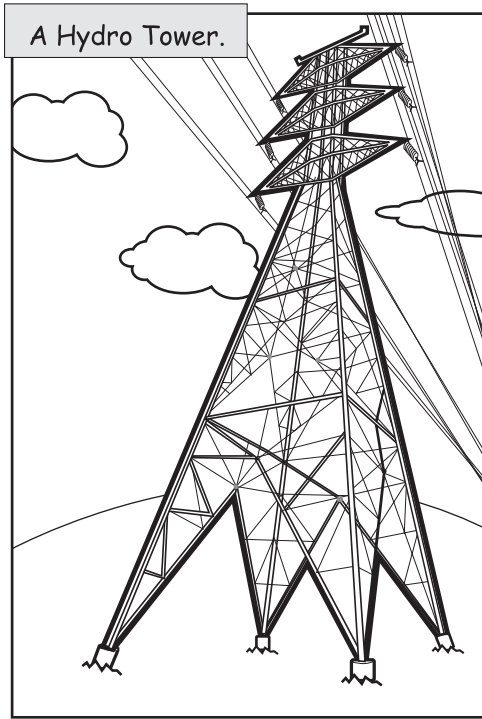

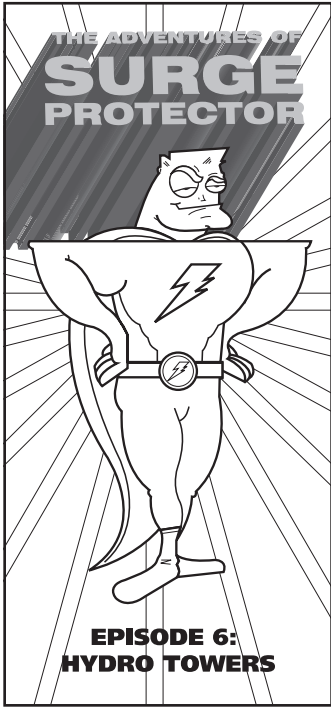

**NEVER** go near a downed powerline!  
If you happen to see one, report it to  
an adult and stay as far away as possible.  
Luckily, **SURGE PROTECTOR** was here!

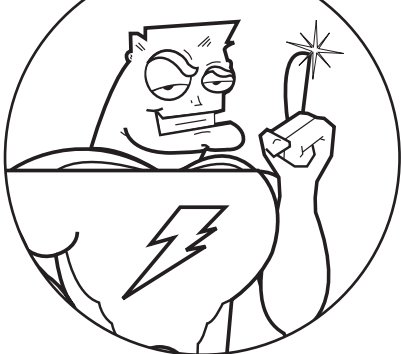

Remember...

**NEVER** climb a fence or enter an area which has **KEEP OUT**, **DANGER**, **HIGH VOLTAGE** or any other type of warning sign on it.  
Luckily, **SURGE PROTECTOR** was here!

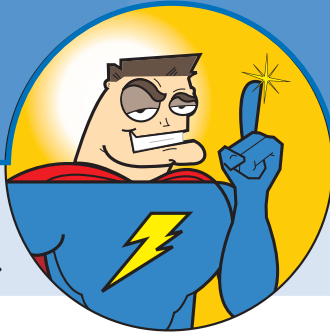

Remember...

**NEVER** climb or go near a Hydro Tower. They are highly **DANGEROUS** and are not to be used as a playground. Luckily, **SURGE PROTECTOR** was here!

# HEY

# KIDS!

Follow my **10 Simple Tips** on avoiding electrical hazards.

In no time you'll be part of the **Surge Protector Team!**

- 1** NEVER put your fingers or toys into outlets. Only cords go into outlets.
- 2** NEVER use electrical equipment around water. Example: **DO NOT** use hairdryers or radios in or around the bath/shower or swimming pool.
- 3** NEVER play near broken outlets or in areas with lots of electrical cords. Example: **DO NOT** play near computers, TVs or stereo systems.
- 4** NEVER pull a plug out by the cord.
- 5** NEVER play with any torn or taped electrical cords, wires or switches and keep them away from heat and water.
- 6** NEVER stick objects into electrical equipment. Example: **DO NOT** stick a fork in the toaster.
- 7** NEVER go near a downed powerline.
- 8** NEVER climb utility poles, transmission towers or fences around substations.
- 9** NEVER climb trees that are near powerlines or fences with signs that read "DANGER", "HIGH VOLTAGE" or "KEEP OUT".
- 10** ALWAYS ask for help you when it comes to electricity and electrical objects.
